

Birds-I-View's Hummer Quiz!

Answers revealed at the BIV upcoming Seminars! Jot your answers down on a piece of paper with your name and phone number...bring it with you to the seminars ... and you will have a chance to win a SPECIAL door prize!

1. Which species of Hummingbird is pictured right?
2. Which species of Hummingbird is pictured above? (While rarely seen in Missouri, this species HAS been documented here!!)
3. How many different species of Hummingbirds have been banded in Missouri?
4. A rugged little hummingbird banded in 2010 still holds the "long distance" record for most miles between location first banded and location recaptured. Where was the bird first banded, and where was it later recaptured?
 - A. Banded in Alabama and recaptured in Wisconsin
 - B. Banded in California and recaptured in Oregon
 - C. Banded in Florida and recaptured in Alaska
5. True or False: Ruby-throated Hummingbirds love to eat whiteflies so you should put a hummingbird feeder near your tomato plants

Answers provided at our August 2016 Seminars:

“Hummingbirds” and “Silhouette Birding”

Saturday, August 13th at 9 am

And repeated

Saturday August 15th at 6 pm

(both programs at each presentation time)
